Product Introduction

The Igenesis Nucleic Acid Extraction and Purification Kit is designed to provide a diverse range of molecular point-of-care testing solutions, which is compatible with the third-party detection reagents to supply more business possibilities.

Advantages

- Magnetic beads nucleic acid extraction technology
- Accurate results: CV value $\leq 5\%$, coincidence rate is 100%
- Extract nucleic acids from complex biological samples (swab, serum, plasma, urine, sputum, saliva, tissue, etc.)
- Solid material transfer
- Microfluidic technology
- Preloading reagent
- Patented freeze-drying technology
- Fully enclosed iCassette

Compatibility and flexibility

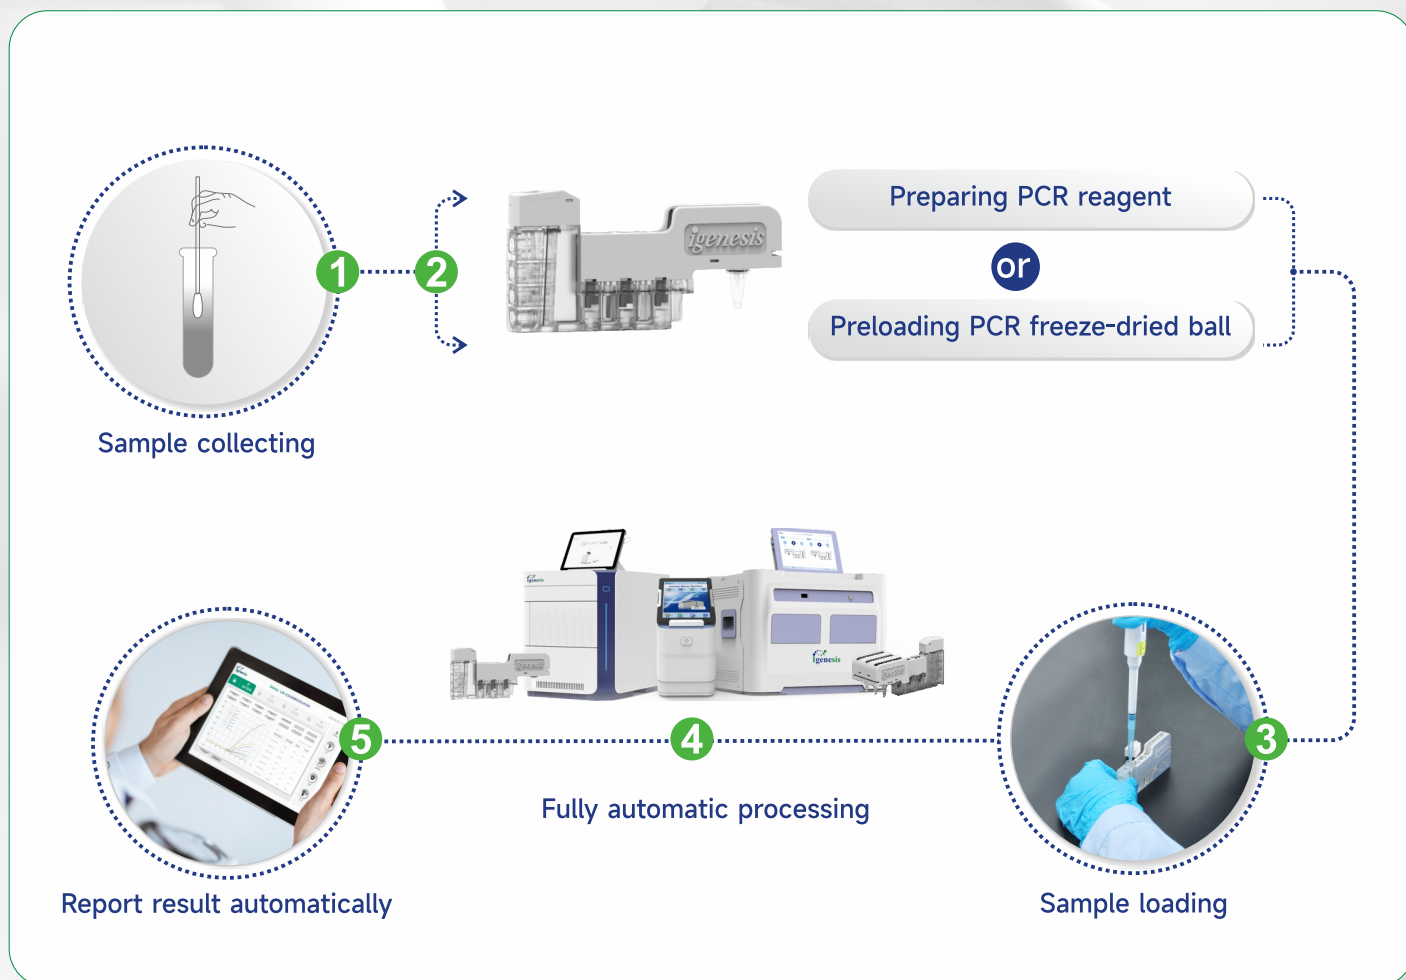

Adaptation of third-party PCR reagents

Customized collaboration mode

7-colour fluorescent system, Up to 54 multiple targets

Work flow

Easy | Fast | Safe

Ordering Information

Product	Cat.No	Specification
Nucleic Acid Extraction and Purification Kit (One in one)	106-0051-01	12 tests/kit
Nucleic Acid Extraction and Purification Kit (Three in one)	106-0119-01	6 tests/kit
